PROFESSIONAL SUMMARY

I am a passionate undergraduate computer science student with a strong foundation in programming and web development. I enjoy creating efficient solutions to real-world problems using different technologies. I am committed to continuous learning and contributing to impactful projects in software development and technology.

TECHNICAL SKILLS

Languages/Database: PHP, Python, Javascript, MySQL

Frameworks/Technologies: Laravel, ReactJS, ExpressJS, JQuery

Tools: Linux, Git/GitHub, VSCode

PROJECTS

Omnifood | *HTML, Tailwind CSS, JavaScript, MariaDB, Vercel*

[\[Live Demo\]](#) [\[GitHub\]](#)

- Designed and implemented a visually appealing and responsive food delivery website using modern frontend technologies.
- Built a complete user login system with features for account creation, modification, and deletion.
- Used JavaScript file handling to manage user credentials securely. Deployed on Vercel for scalability and ease of maintenance.

Social Instacap | *Laravel, PHP, MySQL, Postman*

[\[GitHub\]](#)

- Implemented features with MVC architecture such as user registration, login, and post creation, Deletion, Updation and admin panel.
- Developed a dynamic social media web application to enhance user engagement and interactivity.
- Optimized database queries in MySQL to improve data retrieval performance.

Saga Project | *PHP, MySQL*

- Implemented form handling in PHP to collect and display user input on a preview page ready for printing.
- Aligned the layout of the preview page for enhanced user interaction and print-friendly design.

Stunning SLMS | *C++, OOP, DSA*

[\[GitHub\]](#)

- Developed a console-based Student Learning Management System using core Object-Oriented Programming principles.
- Implemented a student panel with features like registration, sign-in, and viewing personal information.

EXPERIENCE

Tech-Inn Solution

Jan 2025 – On Going

Software Trainee

On Site

- Contributed to the development of a social media web application Social Instacap, Saga Project using Laravel's MVC architecture.
- Integrated MySQL with Laravel perform efficient CRUD operations, fetching and returning data to the frontend via JSON responses. Laravel to handle data operations such as user authentication and post management.
- Collaborated with the frontend team to ensure smooth API communication and consistent user experience.

EDUCATION

Virtual University, Gujranwala

September 2023 – On Going

Bachelor of Science in Computer Science

CGPA: 3.06 / 4

Coursework: Web Services, Database Systems, Information Security, OOP, DSA, Computer Networks, Operating Systems
